

MULTI-FUNCTION MACHINE

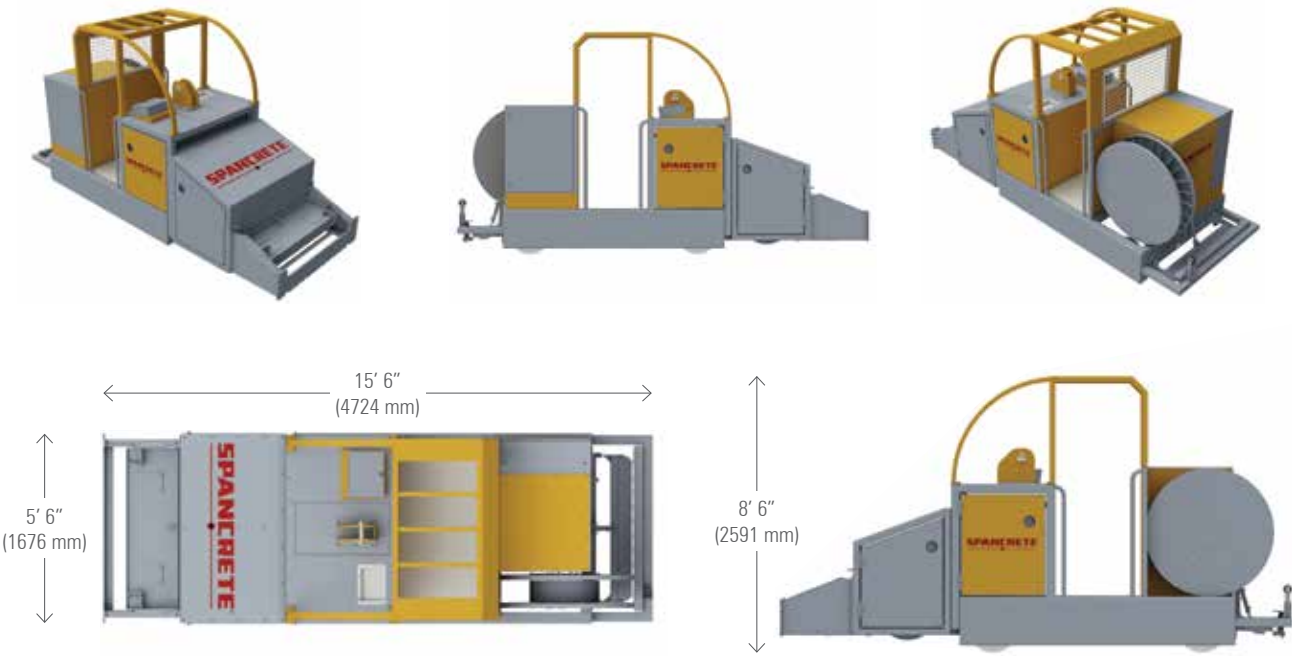

The Spancrete Multi-Function Machine carries out different tasks, from cleaning the top surface of the casting bed and collecting waste, to pulling the strands on a clean casting bed, as well as oiling the bed just prior to production. It features 4-wheel drive for easy operation and the flexibility of pulling multiple strands in one pass for the full length of the bed, providing the ultimate in efficiency.

Additional side scrapers and brush attachments can aid in the cleanup and bed preparation process.

MULTI-FUNCTION MACHINE

TECHNICAL DETAILS

Dimensions (LxWxH)	15.5 ft (4.72 m) x 5.5 ft (1.68 m) x 8.5 ft (2.59 m)
Weight	9,920 lb (4,500 kg)
Power Supply	240 V/480 V or a battery option
Battery Capacity	48 VDC
Speed	Up to 200 ft/min (60 m/min)
Oil Capacity	150 L
Front Brush	23.6 in (600 mm) diameter
