

# DOUBLE TEE RACK

Engineered to facilitate simplified double tee transportation, the Spancrete Double Tee Rack is custom designed to accommodate any double tee configuration and size, including lengths up to 75 feet (22.9 m) and weights up to 40,000 pounds (18,184 kg) per rack. It provides superior support to both flange and stem—minimizing the risk of twisting, cracking and other shipping-related damage.

#### Features include:

- Tilting rack to reduce the legal load width
- Tilted and level lockable positions for safe loading/unloading
- Non-marking guides to prevent damage to product

## TECHNICAL DETAILS

Capacity	40,000 lb (18,184 kg)
Height	50 in (1.27 m)
Length	53 in (1.35 m)
Width	8 ft (2.4 m)
Weight	1,300 lb (590 kg)
Operation	Rack rotates with weight of loaded double tee

\*All capacities and dimensions are customizable.
